Products – Counterfeit Fraud - Fraud Fighter UV Authentication Pen

Fraud Fighter UV Authentication Pen

Now 5 x more powerful.

The Fraud Fighter UV Authentication Pen uses a genuine 375 nm LED, so you can see ALL possible UV features

A law enforcement favorite, the Fraud Fighter UV Authentication Pen may be used to detect counterfeit currency, credit cards, driver licenses, secure and chemically altered checks, cashiers checks, passports, visas and many other important documents. Patents pending worldwide.

Unlike small, toy-like UV key-chain lights, the Fraud Fighter UV Authentication Pen is the tool of a professional. Metal construction, life-time warranty, and consistent performance throughout the lifespan of the batteries means this device will do the job for years to come. Don't get stuck worrying if your portable UV light will work when the battery is no longer new. The Panagio Pro performs at specified wavelength throughout the life of the batteries.

Specifications

The Fraud Fighter UV Authentication Pen is the size of a normal fountain pen and may be used in any location in normal lighting conditions

- Power Input - Uses 2 x AAA alkaline batteries
- UV Source - 375 - nm focused beam.
